STATEMENT OF INSPECTION

Amherst, Mass.

TO WHOM IT MAY CONCERN:

This is to state that I have examined for trueness to name all the saleable apple stock of Wallingford Nurseries now growing near Wallingford, Connecticut, and as they now stand in the nursery row all varieties are, to the best of my knowledge and belief, true to name.

J. K. Shaw Research Professor of Pomology.

NON-WARRANTY

We strive to avoid mistakes, but in the event that any nursery stock sold by us should prove intrue to the label under which it is sold, provided notice and proper proof are furnished to the seller, the seller shall, at the option of the buyer, either refill that portion of the order which was mislabeled, by another delivery of stock or refund the purchase price. But in any case the seller is not to be held responsible for a sum greater than the original selling price of such stock. All sales or agreements to sell are made subject to shortage of nursery stock from fire, frosts, drought, or other causes beyond control of the sellers.

APPLICATION OF PRICES

Customers may select 5 of any kind (such as 5 peach) at the 10 rate, 50 at the 100 rate, 500 at the 1000 rate, $\,$

DISCOUNT

5% discount may be deducted on all orders where the total amount is remitted with the order and this is sent before April 1st.

SIZE OF TREES

Caliper or diameter governs the size of all fruit trees except 1-year apple. Height is only approximate.

STANDARD APPLE TREES ORDER EARLY

Permanent apple trees are usually planted about 40 feet apart. Some growers prefer more, some a little less. Some also use fillers, such as peach trees, or early bearing varieties of apples, making them 20 feet apart, or if planted only in the center of the 40-foot space the distance will be 28 feet. As the trees begin to crowd, taking out one-half will leave them 28 feet apart and later when the remaining fillers are removed, the distance will be 40 feet. Thus an income can be had for many years, when the permanent trees will need only a portion of the land.

Two years old 11 in. and up Baldwin: Trees.

For home planters who wish an unusually large tree, we offer seven-year old, nade possible a wonder s safely as small trees. nderful root system so that the trees may be transplanted just

We are selling only apple trees of our own growing and every tree offered by us has had $\mathrm{Dr.\ Shaw}$'s inspection.

The demand and shortage during the past three years have caused the continual selling of one-year trees, thus making a shortage of two-year stock and in many varieties we are very low in two-year. Our customers may specify when shipment is wished in the spring, but we do urge that orders be placed early and the trees

°Baldwin. Large red winter apple. Known by all. The heavy mortality in older orchards from the severe winter of 1934 most certainly will result in decreased production for years. In good Baldwin sections, why not plant Baldwin?

*Cortland. Very similar to McIntosh in flavor. Larger, darker red, ripens two weeks later, hangs to tree better and well worth planting.

°Red Strain Delicious. A bright red strain, colors early and considered much superior to common Delicious.

*Duchess. Striped red. Early August. Following Red Astrachan.

Early McIntosh. A cross between McIntosh and Yellow Transparent.
Fruit is very similar to McIntosh in appearance, ripening about two weeks after

Fall Pippin. Well known fall variety.

Gallia Beauty (Red Rome Beauty). Generally considered to be the best red strain of Rome Beauty. An early and annual bearer of late winter apples which retain a bright, shiny appearance until spring.

Gravenstein. Large, striped, red. August and September.

°Red Gravenstein (Washington strain). Originated in the state of Washington and is said to be the best red strain of Gravenstein. The fruit is similar to Gravenstein but a darker red and very little stripe.

Kendall. (Description by New Yard-Fruit Testing Association, Geneva.

"It is handsomely colored over the entire surface with dark red covered with a rich bloom. It has attracted more attention from fruit growers than any other new apple. Its season is about that of McIntosh, but it keeps a little longer. The apples are large, trim in outline, and possess the whitish, fine-grained flesh of McIntosh. The apples hang better than McIntosh but not as well as Cortland. Kendall promises to be the apple of apples in the McIntosh season."

Lodi. This is an introduction of the New York Fruit Testing Association at Geneva. The fruit has the same color as Transparent, ripens at the same season, but will average over twice as large. We have only a very limited supply of one year trees which we offer at 25¢ each extra.

Macoun. (Description by New York Fruit Testing Association, Geneva,

New York.)

"Just as Early McIntosh advances the season for the MeIntosh type of apple, Maeonn produces a late erop of these red-skinned, white-fleshed, richly flavored, aromatic apples. The season of Macoun is from one to two months later than that of MeIntosh with Cortland midway between. In shape, the fruits of Macoun are similar to those of McIntosh; the color is a darker red, less striped, and with a heavier bloom; the flesh is much the same in color, texture, flavor and aroma. The trees bear regularly and heavily."

†*McIntosh. Known by everyone. Season of picking, last of September.

°Melba. One of the newer varieties. Similar to Duchess in season and markings, but better quality and larger.

Milton. (Description by New York Fruit Testing Association, Geneva.

"Milton is a sister of Early McIntosh which ripens its erop a month later. Its main value is that it is a McIntosh type which ripens before McIntosh. The tree is vigorous but not as large as that of Early McIntosh. The fruits are covered with a very pinkish red and heavy bloom. The flesh is white, tender, crisp, juicy and of McIntosh flavor and aroma."

Northern Spy. Well known early winter, red variety.

Opaleseent. Very large, red apple. Fall.

Pound Sweet. The old fashioned, large, green, sweet apple.

Red Astraehan. Best, early red apple. August 1st.

Red Rome Beauty. See Gallia Beauty.

Red Spy. A sport of Northern Spy. Similar in all respects to Northern Spy except in coloring in which it much surpasses its parent, having a solid red.

R. I. Greening. Fine dessert variety. Early winter.

Rome Beauty. Late, red winter apple. Very productive.

Roxbury Russet. Very late winter russet apple.

Stayman Winesap. Standard winter apple in New Jersey. A good variety for late winter in some sections of New England. Large, red apple.

*Wealthy. Fine filler variety. Often bearing fruit in the nursery at two years of age. Red. Late August.

Wagner. Great filler variety. Bears young. Red, early winter.

Williams Red. Summer apple. Following Duchess.

†Yellow Transparent. The first early apple of importance. Fine filler

°Hyslop Crab. Very productive. Red.

PEACH TREES

Peach tree planting and peach production seem to run in definite cycles which have a direct bearing on the price the fruit brings. Since 1925 the planting of peach trees has been very light and from 1925 to 1932 production heavy and prices low. Now, however, with older orchards gradually going out, production has been lower and prices better, and we are definitely on the up grade in price for a series of years. The far-sighted orchardist will not delay in immediate planting of

of years. The far-sighted orchardist will not delay in immediate planting of peaches that he may get them into full production during this up-grade swing in the price of fruit.

Our peach trees will be spring dug and for spring of 1937 we have a very excellent lot of trees and prices have been reduced nearly 33 1/3%. Due to seed failure, our supply of trees for 1938 will be very short. Spring of 1937 is the real right time to plant.

TIME OF RIPENING IS FOR CONNECTICUT CONDITIONS

Greensboro. August 1st. Medium size. White flesh. Very productive. Mikado. (June Elberta) August 1st. A very handsome roundish variety, ow flesh—excellent quality.

Buttercup. August 3rd. Very similar to Mikado, but slightly larger. Marigold. August 8th. Yellow, semi-free, ripening at a time which is very desirable, filling a season where there has usually been a slight break.

Oriole. August 10th. Nearly free, yellow and starts to ripen just ahead of

Carman. August 15th. Medium to large. White. Very hardy variety. Cumberland. August 15th. Practically free, white flesh, dark red coloring, elongated in shape, good size. Best white of its season. Golden Jubilee. The most outstanding introduction of the New Jersey Experiment Station. A block laden with rich golden yellow, red blushed fruit is a handsome sight. Similar to Elberta in general appearance, but a brighter golden yellow, slightly smaller size and much better flavor.

AN EY

Eclipse. August 25th. Medium size, yellow frecstone, red cheek

South Haven. August 25th. A very large yellow freestone of Michigan origin. Tree is thrifty and productive.

Belle of Georgia. September 1st. Probably the best known and most popular of white varieties.

 ${\bf Early\ Elberta}.$ Ripens just ahead of regular Elberta. Lighter yellow and brighter red, otherwise similar to Elberta.

Elberta. September 4th. Known to all. King of Peaches.

J. H. Hale. September 8th. The tree is not a very strong grower, but the fruit of well grown J. H. Hale are immense, handsome and of excellent flavor.

Lizzie. September 20th. Best of its season. Similar to Elberta, being a chance seedling of that variety. Not quite as much red, but otherwise similar.

Peach Special No. 1. This variety originated as a chance seedling. The original tree is now gone, but in our search for a yellow freestone variety to follow Golden Jubilee, we decided that this variety had the qualities we were looking for. We have planted it in our own orchards, which came into bearing last year. It has all the appearances of Efberta in shape and color and of most excellent flavor. We have made no attempt to introduce this variety or to name it, but we have grown trees primarily for our own orchard planting and have a few to offer our eustoners.

Comparative sizes of our 17, 16 and 11 in. Peach Trees.

OUR PATRONS WILL GREATLY OBLIGE US BY USING THIS

Delmar, New York, March 16, 1936.

Gentlemen:

I have inspected your unrseries and believe if yon are given half a break by the weather man, you can turn out trees as good, if nut better than any nursery in the east.

Pery truly yours, Haswell Fruit Farms.

March 25, 1936.

John C. Usher,

For evergreen hedges, screening, mass planting, etc.

FLOWERING AND SPECIMEN TREES

Beech. Purple leaved. Dug with ball of earth. 4-5 ft. @ \$5.00.

Catalpa Bungei. (Umbrella Tree) 2 yr. heads \$1.00 Each.

Crabs. This group makes one of the prettiest for lawn and specimen trees, being valuable not only for their blossoms, but also the resulting small fruit which adorn many of these varieties, often hanging to the tree even into winter.

Bechtel's Crab. Double flowering, peach blossom pink. Very sweet, 3-4 ft. @ \$1.00.

Floribunda Crab. Beautiful peach pink. 4-5 ft. @ \$1.00.

Carmine Crab. Very showy. Rich rosy red. 4-5 ft. @ \$1.00. Cherry, Japan Pink Flowering. 5-6 ft. @ \$2.00.

Cherry, Japan Weeping Pink Flowering. 5-6 ft. @ \$3.00.

Dogwood, Pink Flowering. A most beautiful and striking lawn specimen tree. Dug with ball of earth. 3-4 ft. @ \$2.00.

Dogwood, White Flowering. Dug with ball of earth. 4-5 ft. @ \$2.00.

Magnolia Soulangeana. Bright pink. Dug with ball of earth. 3-4 ft. @ \$3.00. Mulberry, Teas' Weeping. 2 yr. heads, 5-6 ft. trunks @ \$2.00.

Thorn, Paul's Scarlet. Beautiful scarlet flowers. 4-5 ft. @ \$2.00.

Wisteria, purple Hall's Japan Honeys	ackle		Each \$.50	Ten
Clematis Paniculata	White, late summer A purple hybrid		.35	\$3.00 3.00

SHRUBS

Shrubs naturally vary in their habit of growth. Some large, some small, some medium. We shall in each case furnish the very best 2-year No. 1 plants, \$.50 each except where otherwise stated.

Althea. (Rose of Sharon) Red, pink or white. Very erect. Late summer. Almond. Pink Flowering. Beautiful old fashioned plant.

Azalia Mollis. A Japanese variety ranging from yellow to orange. 12-18 in.

Azalia Kaempferi. (Torch Azalia) Beautiful orange red flowers. 12-18 in.

Beauty Bush. One of the newer varieties. Very profuse bloomer, with pink flowers in early June. 75ϕ each.

Butterfly Bush. Although of a woody nature, the growth kills back each winter to within a few inches of the ground, then making three to five feet the following summer, it being covered with purple or lavender sweet scented flowers which attract myriads of butterflies. Hence its name.

Coral Berry. Pink flowers, followed by red berries.

Deutzia Gracilis. Dwarf, white, June.

Forsythia Spectabilis. One of the earliest and most profuse bloomers. Honeysuckle, Pink Tartarian. Pink flowers. June. Followed by red berries in late summer. Very attractive.

Honeysuckle, White Tartarian. Similar to the pink variety, but flowers white. Hydrangea P. G. Large cone shaped flowers. Late summer.

Hydrangea Hills of Snow. White ball shaped flowers. Late summer

Japan Quince. Brilliant scarlet flowers in May.

Japan Kerria Fl. Pl. A most striking bush with greenish bark and double yellow blossoms in May. 75¢ each.

Lilac. Purple.

ic. Furne.

c. Named varieties @ 75¢.

Madam Lemoine. Double, white.

President Grevy. Double, dark blue.

Souvenir de Ludwig Spaeth. Single, red.

Mock Orange Syringa. Cream colored, very sweet scented flowers. June.

Mock Orange Syringa Virginalis. An improved variety of the old fashioned Mock Orange. Larger, double flowers

Spirea Anthony Waterer. Dwarf. Pink. June and July.

Spirea Tricocarpa. (Korean Spirea) One of the newer varieties similar to Spirea Van Houttei, blossoming later. Spirea Van Houttei. Mass of white. Early June.

Snowball, Japan. White ball shaped flowers. Late May. 75¢ each.

Snowberry. Pink flowers followed by white berries in fall.

Weigelia Eva Rathke. Crimson flowers. June.

Weigelia Rosea. Pink. Early June.

White, pink or red. \$.35 each, 3 for \$1.00. We offer over 50 named varieties at varying prices. Special peony list on

ROSE BUSHES

We handle only the best two-year plants. They are not to be compared with department store "so called bargains." $\,$

CLIMBING ROSES-40¢ each, \$3.50 per ten

American Pillar. Single, rosy-pink, large flowers.

Climbing American Beauty. Red.

Dr. Van Fleet. Flesh pink.

Dorothy Perkins. Pink.

Excelsa. Crimson red.

Gardenia. Cream yellow

Mary Wallace. Salmon pink

Paul's Scarlet. Scarlet

Primrose. A new hardy, yellow climber with large double, canary yellow flowers in great profusion.

Silver Moon. Pure white, yellow stamens.

White Dorothy Perkins. White.

HYBRID PERPETUALS (HARDY)

Best 2 yr. No. 1 American Beauty, Red.

General Jacqueminot. Red.

Frau Karl Druschki. Pure white.

TEA ROSES (EVERBLOOMING)

Best 2 yr. No. 1

40¢ each, \$3.50 per ten

Betty Uprichard. Brilliant, copper red buds and semi-double, salmon pink flowers stained with copper pink on outside. Columbia. Vivid pink.

E. G. Hill. Large blossoms of deep maroon, velvety inside, glistening outside Very fragrant.

Etoile de Hollande. Dark, velvety crimson.

Francis Scott Key. Brilliant crimson.

Gruss an Teplitz. Very free bloomer. Bright crimson red.

K. A. Victoria. Pure white. Very fine form.

Killarney White. Pure white.

Miss Rowena Thom. Brilliant, satiny pink, shaded with orange. Flame at

Mme. Butterfly. Bright pink, apricot and gold.

Mme. Edouard Herriot. Coral red, shaded yellow and scarlet.

Mrs. Aaron Ward. Yellow, sometimes shaded salmon and rose. Mrs. Charles Bell. Salmon, turning to pearly pink.

Mrs. E. P. Thom. Fine long buds open into rich lemon-yellow bloom.

Pink Radiance. Carmine pink, yellow at base of petals.

President Herbert Hoover. Maroon, orange and gold, long pointed buds, rigid stems and continuous bloomer. Red Radiance. Dazzling, crimson scarlet.

Talisman. Orange red, golden yellow and copper red.

Red Baby Rambler. A very free bloomer with blooms similar to crimson rambler, but plant dwarf.

SOME NEWER VARIETIES

Blaze. (U. S. Plant Patent No. 10.) Sometimes called Everblooming Paul's Scarlet. Similar to this variety but continues to bloom all season until hard frost. \$1.00 each.

Golden Climber. (Mrs. Arthur Curtis Jones.) (U. S. Plant Patent No. 28.) A very hardy new yellow climber. Blooms over a long period even in late summer and fall. Semi-double blooms of pure gold on 15 to 18 inch stems. \$1.00 each.

New Dawn. (U. S. Plant Patent No. 1.) Vigorous free bloomer. Flowers similar to Dr. Van Fleet. \$1.50 each.

Countess Vandal. (U. S. Plant Patent No. 38.) Long, pointed bud, coppery bronze, suffused with soft gold. \$1.00 each.

EVERGREENS

We have a large assortment of varieties and sizes of evergreens, but as our past experience shows that buyers prefer to see this class of stock, we shall not attempt to list them, but in the spring we shall be glad to have our customers call

TESTIMONIALS

New York, N. Y., April 8, 1935.

Gentlemen:

If we have as good linek with these as we had with the trees we bought from you last year, we will be mighty well pleased. All of the trees purchased from you last year responded splendidly.

Very truly yours, T. A. Ryan.

Mystic, Conn., April 3, 1936.

Two years ago the 300 trees purchased from yan and set on land adjoining this block all lived.

Yours very lenly, Robert Whittle.
